

Project 4 Part 2 Graham Scan Hull

Name: Forrest Meng Period: 2 Date: 11/27/2019

Did you create a class to store a point? Yes

Did you use a vector to store the points you generated? Yes

Did you sort using the sort method offered by C++? Yes

Did you use at least one stack? Yes

Paste here 2 clear picture of the graph that you obtained by running your application 2 times. Each point on this graph should be graphed as a small circle (radius 2 or 3) and the convex hull you obtained should be on the graph too. (if you wish you may use colors)
